Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims **4-6**, drawn to an apparatus, classified in class 422, subclass 186.
- II. Claims **7-14 and 27-33**, drawn to an apparatus, classified in class 422, subclass 186.
- III. Claims **23 and 24**, drawn to a method, classified in class 204, subclass 157.15.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions.

Group I is an apparatus requiring a solution containing anthracene and does not require a polymer disposed in said solution;

Group II is an apparatus requiring a solution containing anthracene and a polymer disposed in said solution;

Group III is a method that does not require a solution containing anthracene and/or a polymer disposed in said solution.

The inventions recited above contain limitations that are different from each other and are not required for each of the Groups. It would be a burden on the Examiner to search for the specifics for each Group when they are not even required for each

Group.

Inventions III and I-II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as an apparatus not requiring a solution containing anthracene and/or a polymer disposed in said solution.

Because these inventions are distinct for the reasons given above and the search required for Groups I and II is not required for Group III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edna Wong whose telephone number is (703) 308-3818. The examiner can normally be reached on Mon-Fri 7:30 am to 5:00 pm, alt. Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathryn Gorgos can be reached on (703) 308-3328.
